JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Author Index Volume 87 (1997)

Alzer, H., A harmonic mean inequality for the gamma function 195–198
Amato, U. and **I.D. Feis**, Convergence for the regularized inversion of Fourier series 261–284
Amodio, P. and **F. Mazzia**, Numerical solution of differential algebraic equations and computation of consistent initial/boundary conditions 135–146
Amodio, P. and **L. Brugnano**, A note on the efficient implementation of implicit methods for ODEs 1– 9
Area, I., E. Godoy, A. Ronveaux and **A. Zarzo**, Minimal recurrence relations for connection coefficients between classical orthogonal polynomials: Discrete case 321–337

Borcea, L. and **G.C. Papanicolaou**, A hybrid numerical method for high contrast conductivity problems 61– 77
Brugnano, L., see **Amodio, P.** 1– 9
Bultheel, A., C. Díaz-Mendoza, P. González-Vera and **R. Orive**, Quadrature on the half line and two-point Padé approximants to Stieltjes functions. Part III. The unbounded case 95–117

Climent, J.-J., M. Neumann and **A. Sidi**, A semi-iterative method for real spectrum singular linear systems with an arbitrary index 21– 38
Coulibaly, I. and **C. Lécot**, Particle simulations of the Kac model of the Boltzmann equation 169–193

de Silanes, M.C.L., Convergence and error estimates for (m, l, s)-splines 373–384
De Meyer, H., G. Vanden Berghe, T. Van Hecke and **M. Van Daele**, On the generation of mono-implicit Runge–Kutta–Nyström methods by mono-implicit Runge–Kutta methods 147–167
Díaz-Mendoza, C., see **Bultheel, A.** 95–117

Feis, I.D., see **Amato, U.** 261–284
Franco, J.M. and **I. Gomez**, Two three-parallel and three-processor SDIRK methods for stiff initial-value problems 119–134

Gilewicz, J. and **M. Pindor**, Padé approximants and noise: A case of geometric series 199–214
Godoy, E., see **Area, I.** 321–337
Gomez, I., see **Franco, J.M.** 119–134
González-Vera, P., see **Bultheel, A.** 95–117

Hasegawa, T., Numerical integration of functions with poles near the interval of integration 339–357
Hyvönen, S., Convergence of the Arnoldi process when applied to the Picard–Lindelöf iteration operator 303–320

Jackiewicz, Z., R. Vermiglio and **M. Zennaro**, Regularity properties of multistage integration methods 285–302

Lécot, C., see **Coulibaly, I.** 169–193
Liu, J.-L., see **Yang, S.-Y.** 39– 60

Marcellán, F., H.G. Meijer, T.E. Pérez and **M.A. Piñar**, An asymptotic result for Laguerre–Sobolev orthogonal polynomials 87– 94
Martin, C.F., see **Zhang, Z.** 359–371
Mazzia, F., see **Amodio, P.** 135–146
Meijer, H.G., see **Marcellán, F.** 87– 94
Miller, A.R., A class of generalized hypergeometric summations 79– 85

Neumann, M., see **Climent, J.-J.** 21– 38

Orive, R., see **Bultheel, A.** 95–117

Papanicolaou, G.C., see **Borcea, L.** 61– 77
Pérez, T.E., see **Marcellán, F.** 87– 94
Piñar, M.A., see **Marcellán, F.** 87– 94
Pindor, M., see **Gilewicz, J.** 199–214

Renaut, R., Stability of a Chebychev pseudospectral solution of the wave equation with absorbing boundaries 243–259
Rice, J.R., E.A. Vavalis and **D. Yang**, Analysis of a nonoverlapping domain decomposition method for elliptic partial differential equations 11– 19
Ronveaux, A., see **Area, I.** 321–337

Sidi, A., see **Climent, J.-J.** 21– 38
Simos, T.E., see **Thomas, R.M.** 215–226
